Hi all –

See below for a question from CNN. I pulled the following estimates from SDWIS/Fed for Drinking Water Populations – can you please verify?

Durango – approx. 23,000 people

Glacier Club – approx. 525 people

And any idea on the ag use question? Do you have a contact elsewhere that might be able to help?\

Thanks!

Sarah E. Bahrman | Acting Director, Water Program | U.S. Environmental Protection Agency - Region 8

re-sending this to include Libby and to add another question: how many people use

water from the Animas River for drinking water, and to what extent is water from this river used to irrigate crops? I asked folks from the La Plata County emergency preparedness dept and they referred me to the EPA. Many thanks. My deadline is very soon - please respond ASAP. I appreciate it.

Dear David,

Hello! Thank you for your voicemail. I'd love to take you up on your offer to speak with your toxicologist. After reading the results on the EPA's website, the toxicologists I've spoken with are concerned about high levels of several metals, including arsenic, cadmium, and lead. I made a PDF out of the findings and attached it on this email - I've highlighted the ones the experts are concerned about. I'm on deadline and need to speak with your expert ASAP.

Many thanks.

Elizabeth
